--				

* These results are for some reason not included in the WFDF archive list on the early world records, but are documented in other places that can be regarded as credible.

** It's not 100% verified which discs were used for these results. I've got comments like "I think..." or "I'm almost certain that..." from players with memories of the early records. Unfortunately the discs used are not part of the official archives.

*** This result is included in the WFDF record list. Dave Johnson himself has told me that this actually was an indoor record. Set with a Wham-O World Class 119g in the Los Angeles Convention center in connection with the 1975 World Frisbee Championships.

This list researched and compiled by area46-the frisbee/flying disc zone: <http://www.area46.se>
