

# Czeslaw Slanias Stamp Engravings

A complete list of his 1070 different engravings  
for issued stamps

Compiled by Stephan Pomp based on a list by Lothar Heinrich  
Copyright © 2008 by Stephan Pomp

The question of how many different stamps Slania engraved is often raised. Depending on what is meant by 'different', there are different answers. From the point of view of the engraver 'different' should mean the number of different dies that have been engraved. With this way of counting, the answer is 1070. This number comes from Slania's own count and his personal list on which the present list is based (see comment below). Since Slania had high standards he did not count the engraving of, e.g., numerals for the Danish 'Wavy line' stamps. And he counted only engravings for issued stamps.

The numbering follows, of course, the actual work done and not the date of issue. There are, however, some exceptions. So were, e.g., 1023 FAE 88 to 1026 FAE 91 engraved already 1984 and should have been 644 FAE 47 to 647 FAE 50. Slania assumed that these stamps would never be issued and took them off his list. Thus one could argue that number 996 on this list is the real number 1000 ...

The important count is the total number (first column) and not so much the country name (second column) and country number (third column). This is because the later is sometimes arbitrary like, e.g., the Nils Bohr stamp(s) of 1963, jointly issued by Denmark and Greenland. It is counted as 50 DEN 9 but could as well be 50 GRE 3 instead. Another example is 842 EST 1, an engraving for a stamp jointly issued in no less than four countries. Thus you cannot use this list to extract statistics by individual countries. But again, the focus here is on the engraver and his work and not on all the variations of the final product.

Besides the timeline, the most interesting information from this list is whether a certain motive has been engraved just once. Check out, e.g., the engravings for the joint-issues of Singapore-Sweden (1999), Thailand-Sweden (2002) and Spain-Sweden (2003).

Column four gives the date of issue, column five and six the numbers of a sample stamp by Scott and Michel, respectively. Finally, a description, including the nominal value of the stamp is given in the last column. In the case of a NVI stamp (no value indicated), like the Swedish 'Brev inrikes', the price at the date of issue is given in parenthesis.

Since this is the very first version of this list there are bound to be mistakes. Please let me know if you find some so I can improve the list for v2.0.

With this I wish you a continued happy collecting of the works of the world's foremost stamp engraver.

*Stephan Pomp  
Uppsala, July 2008*

**Important note:**

**This list is based on Slania's own numbering! See the comment at 203 MON 3. Slania's list was first put into an excel file by Lothar Heinrich who gave me the permission to use his list for this compilation and to distribute it over the web. It is o.k. to give copies of this list to fellow collectors but you may not distribute this list commercially or via the web without prior permission from me.**
